**Alkaline Mineral Water!**

Stay hydrated, healthy & active with Waterman  
**Alkaline Mineral Water!**

**ALKALINE MINERAL WATER**  
FRESH & HEALTHY

# Why the Waterman is Good For You

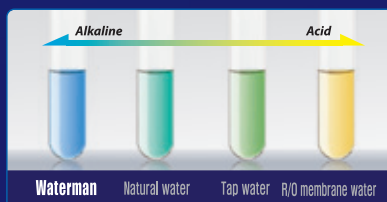

- Removes Harmful Substances
- Alkaline, Magnetised & Energised Mineral Water
- Super Hydrating
- Compact & Portable

## Waterman is a Natural Purifying Filtration System

The Waterman applies nature's principles as water passes through layers of varied compounds to remove residual chlorine, chemical ingredients, heavy metals, impurities and bad odours. Also inhibiting the propagation of bacteria. Waterman provides you with fresh, healthy alkaline mineral water and a taste you'll love.

## Test Results of Acidity and Alkaline

The waterman filter uses silver carbon, bio ceramic, activated coal sands and bipolar magnets to produce clean, fresh, great tasting water enriched with 40 plus sea based essential minerals, including calcium and magnesium which are alkaline in nature. For your health.

## The Waterman Alkaline Mineral Water..

- 600ml Capacity
- Replaceable filter, life cycle 800 litres or 6 months
- Environmentally friendly and economical
- Makes water fresh, tasty and gives you energy
- Removes residual chlorine, heavy metals, chemicals, impurities and bad smells
- Inhibits the propagation of bacteria in water
- Increases the essential minerals
- Changes common water to alkaline water so the pH level is between 8.5 - 9.5 allowing the water to penetrate into your cells, rapidly hydrating and sustaining good health

*"Using the Waterman makes drinking quality water easy, no matter where you are. As a professional triathlon competing all over the world, its always comforting to know that I can have quality water no matter which country I am competing in. The alkalising effect of the Waterman also helps with my recovery. I use it every day!"*

*Peter Robertson 3 x World Champion Triathlete*

## Standards of the Waterman

- No Plastic Leaching
- No Dioxin Leaching
- Durable
- Reuse again and again to prevent waste
- BPA Free
